

Product Info

Torpedo Digital Level - DWL 280

The DWL - 280 is a Torpedo Digital Level having a resolution of 0.05° . The strong impact resistance ABS plastic material is molded with a tough Aluminium base to form the rugged yet elegant body structure.

It has built in strong magnets to hold on to metal work piece.

Features

Measuring range from $0^\circ \sim 90^\circ$ 4 x 90° (360°)

High Resolution of 0.05° (1.0 mm/M)

High Accuracy of $\pm 0.05^\circ$ at 0° & 90°
 $\pm 0.2^\circ$ for other angles

Digital displays of angle & % slope

Auto Reverse Reading of LCD Display

Buzzer sound

3 minutes auto off

Benefits

Digital display for any angle around 360°

Precise, speedy & reliable measurements

No more arguments for Surveying inspection job work sites with digital numeric display readings.

User can simply choose the type of format without the need for calculation

Audible sound to indicate leveling to 0° & any angles halt

Extended battery life

Features

Build-in Magnet

Strong magnets at the level base enable users to hold to variety of metal surfaces which is useful in many practical applications.

Auto Off

The software can intelligently detect when the user is not actively using the level and automatically turn off to preserve power thus extend battery life.
